Sanghamitra Satpathy

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ years of experience, proficient in developing scalable web applications using modern tech stacks. Skilled in both frontend and backend development, strong problem-solving abilities, and a solid grasp of Data Structures and Algorithms. Experienced in Agile environments, version control with Git, and integrating REST APIs to build efficient and reliable solutions.

SKILLS

- HTML
- CSS
- JavaScript
- React.js
- TypeScript
- Next.js
- Redux
- Node.js
- Express.js
- GraphQL
- PostgreSQL
- MongoDB

EXPERIENCE

Full stack Developer | Sep 2024 - Present

CIMET, Jaipur, Rajasthan

- Delivered scalable front-end solutions across multiple internal products, improving code maintainability and UI consistency.
- Developed the JSON Rule Engine micro-service, enabling internal teams to configure dynamic, client-specific rule sets, cutting manual onboarding time by 60%.
- Solely architected Clickout, a dashboard to track and manage click-based client plan quotas, enabling redirection, real-time quota deduction, and improving usability across products through simplified complex data flows and API integrations, including usage logging for up to 2 months of data.
- Collaborated with backend teams for seamless API integration and delivered production-ready UIs using React.js, Next.js, JavaScript, SCSS, Tailwind, and Styled Components.

Backend Developer | Aug 2023 - Mar 2024

Furation Technologies & Solutions, Mumbai, Maharashtra

- Implemented inventory management using TypeScript in a restaurant management system.
- Independently spearheaded a responsive web app project, showcasing proficiency in both front-end and back-end development with integrated dashboards and automated messaging features. Created a WhatsApp chatbot for businesses to enhance user interactions.
- Constructed a quiz app in which I integrated KYC verification, a payment gateway and a live match for multiple users with a leaderboard.

Full stack Developer Trainee | May 2022 - Mar 2023

Masai School, Bengaluru, Karnataka

- Built and deployed 5+ full stack web applications, including a meat delivery platform, a recipe app, a slideshow maker, and several e-commerce sites by contributing to both frontend and backend and collaborating with team members for seamless coordination.
- Learned and applied modern web technologies such as HTML, CSS, JavaScript, React, Redux, Node.js, Express.js, and MongoDB to build scalable, adaptive, and user-friendly applications.

EDUCATION

Full Stack Web Development (Full Time)

Masai School, Bengaluru, Karnataka

May 2022 - Mar 2023

B.A. (Political Science)

Utkal University, Bhubaneswar, Odisha

July 2017 - Nov 2020

PROJECTS

Licious-Clone (Group) Techstacks:- React, CSS, Chakra UI, JavaScript, Node.js, Express, MongoDB

- Engineered a full stack online meat delivery platform enabling users to browse and order fresh meat, fish, and seafood.
- Incorporated the homepage, product listing, and single product detail views with search functionality.
- Configured backend APIs with Node.js and Express, linking MongoDB for product data management and retrieval.
- Designed and integrated core user interfaces, including Navbar, Login, Footer, Cart, and Product pages to support efficient user navigation and purchasing.
